

Family Eye Care

VIRTUALLY ALL OF THE MAJOR CAUSES OF BLINDNESS IN THE UNITED STATES CAN BE DETECTED BY CHANGES IN THE VISUAL FIELD.

A new and highly sophisticated computerized instrument now enables us to provide a more thorough visual field screening analysis. This instrument checks for areas of loss of sight both in the central (**directly ahead**) and peripheral (**side view**) areas. Visual field testing can assist us in early detection of glaucoma, retinal problems, some neurological diseases (such as brain tumors and optic nerve disease), and enable us to better diagnose causes of headaches.

Most visual fields defects are not noticed by an individual until very late stages. We are committed to prevention of eye diseases as well as early detection, which significantly increases the chances of curing the disorder or at least minimizing its effects.

We strongly recommend that all of our patients receive this test as part of their visual analysis. The fee for this test is an additional \$10.00.

******PLEASE NOTE******

THIS TEST IS A SCREENING. IT IS POSSIBLE THAT ADDITIONAL, MORE COMPREHENSIVE VISUAL FIELD TESTING MAY BE NECESSARY BASED ON THE RESULTS OF YOUR VISION ANALYSIS BY THE DOCTOR.
